

# THE CLEAR WAY

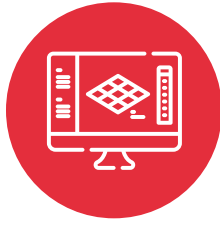

to enter a  
growing  
market.

# Why **Clear Aligners**?

Our Clear Aligners are a comfortable, esthetic and effective solution to treat anterior and premolar malocclusion. They are nearly invisible and have improved stain and tear resistance. Made from premium thermoformed plastic material, they ensure precise fit, ongoing force retention, and exceptional durability.

Our Clear Aligners can be integrated with multiple scanner software vendors and design centers. Our integrated systems make it easy to order, track, and review your clear aligners order.

Protocols

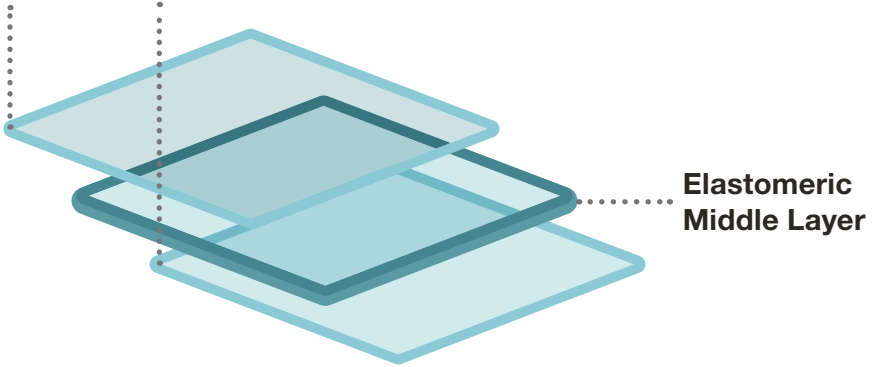

# ADVANCED ENGINEERING

- » Our Clear Aligners are made from a premium thermoformed plastic material that is engineered for **precise fit, ongoing force retention, and exceptional durability.**
- » **Premium Material** – continual force for faster treatment and greater comfort for your patient.
- » **Improved Stain Resistance** – starts clear, stays clear.

**Our Clear Aligners** use an elastomeric layer encased in a dual shell construction that provides a consistent, continual force for your patient's comfort.

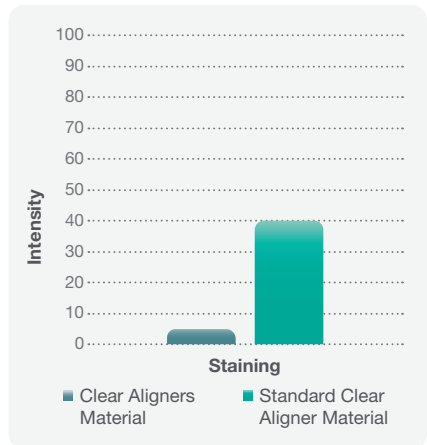

### Dual Shells

The consistent pressure produced by the dual-shell construction accurately moves teeth over the prescribed period of time.

## TEAR STRENGTH & STAIN RESISTANCE

This material has superior ability to resist tearing and staining after an extended period in the oral cavity.

# SIMPLE AND STREAMLINED **CASE MANAGEMENT**

- » Easy to order
- » Easy to track
- » Treatment review and case modification process
- » Support at every stage
- » Fast turn-around time

1

## Initiation

Scan data is entered into the system

2

## Case Acceptance

Lab accepts case from doctor

3

## Design\*

Case is submitted for design / treatment plan.

4

## Approval

Doctor approves treatment plan

5

## Manufacturing

Argen manufactures the clear aligners.

6

## Delivery

Lab receives our Clear Aligner package for delivery to doctor

\*Design is provided by an independent design center.

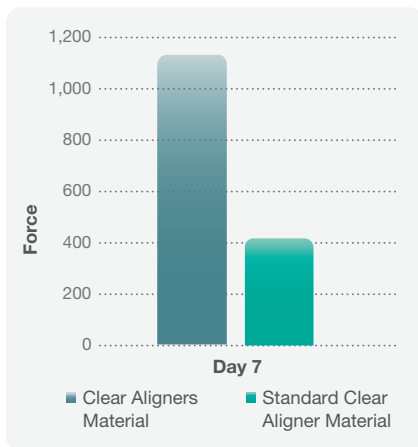

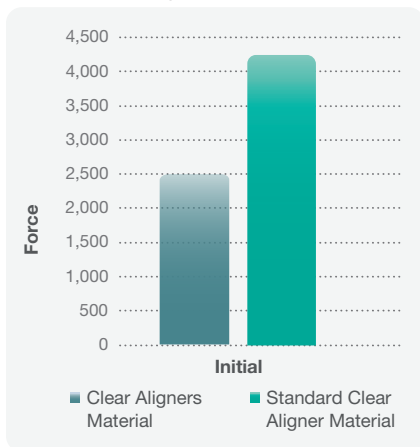

# TREATMENT OPTIONS

On-going force retention provides greater tooth movement over time.

## TOOTH MOVEMENT FORCE AT 98.6° F

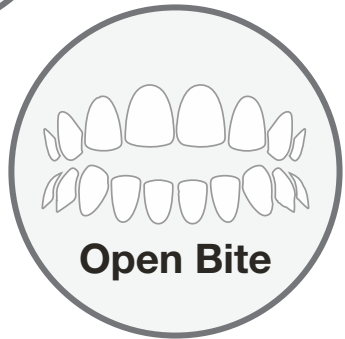

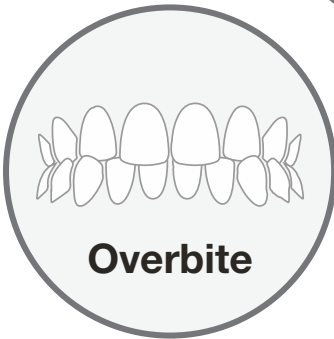

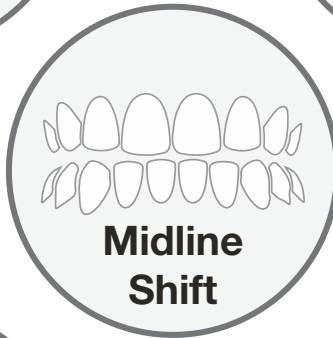

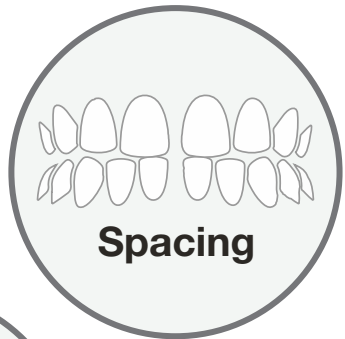

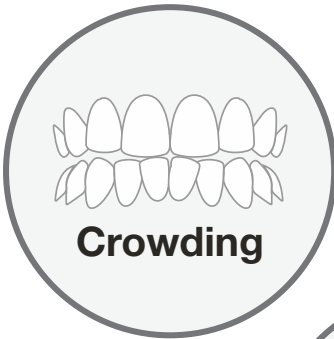

Initial vs. Day 7

# Perfect for **Esthetic Cases**

Ideal for treating mild to moderate cases in the esthetic zone.

# CLEAR ALIGNER PACKAGE

Our package includes everything your patient needs on their journey to a perfect smile.

A **Patient Guide** that explains proper use and care of the aligners.

**Clear Aligners** in clearly marked baggies so patients know the correct order in which to wear them.

A **Care Kit** with tools to help your patient remove and store their aligners safely.
